DISCLAIMER

Please read this section and the following sections entitled “disclaimer of liability”, “no representations and warranties”, “representations and warranties by you”, “cautionary note on forward-looking statements”, “third-party information and no consent of other persons”, “terms used”, “no advice”, “no further information or update”, “restrictions on distribution and dissemination”, “no offer of investment or registration” and “risks and uncertainties” carefully. If you are in any doubt as to the action you should take, you should consult your legal, financial, tax or other professional advisor(s).

This white paper is for informational purposes only. The information set forth below and elsewhere in this white paper may not be exhaustive and does not imply any elements of a contractual relationship. While we make every effort to ensure that all material in this white paper is accurate and up to date, such material in no way constitutes the provision of professional advice. RPGC (hereinafter -RPGC) does not guarantee and accepts no legal liability whatsoever arising from or connected to the accuracy, reliability, currency, or completeness of any material contained in this white paper.

DISCLAIMER

Acceptance

No person is bound to enter into any contract or binding legal commitment concerning the sale and purchase of the RPGC tokens and no cryptocurrency or any other form of payment is to be accepted based on this Whitepaper.

Transmission

This Whitepaper, any part thereof and any copy thereof must not be taken or transmitted to any country where distribution or dissemination of this Whitepaper is prohibited or restricted.

Interpretation

No part of this Whitepaper is to be reproduced, distributed or disseminated without including this section and the following sections entitled "Disclaimer of Liability", "No Representations and Warranties", "Representations and Warranties By You", "Cautionary Note On Forward-Looking Statements", "Third-Party Information and No Consent of Other Persons", "Terms Used", "No Advice", "No Further Information or Update", "Restrictions On Distribution and Dissemination", "No Offer of Investment Or Registration" and "Risks and Uncertainties".

Legal

No regulatory authority has examined or approved of any of the information set out in this Whitepaper. No such action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of this Whitepaper does not imply that the applicable laws, regulatory requirements or rules have been complied with.

Liability

To the maximum extent permitted by the applicable laws, regulations and rules, the Po.et Foundation shall not be liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this Whitepaper or any part thereof by you.

Warranty

The RPGC Foundation does not make or purport to make, and hereby disclaims, any representation, warranty or undertaking in any form whatsoever to any entity or person, including any representation, warranty or undertaking concerning the truth, accuracy and completeness of any of the information set out in this Whitepaper.

RPGC is implemented on the Binance smart chain code base

Built as a standard protocol with modular features, it is designed to tackle the need for a compliant blockchain instrument for the capital markets industry. Most notably, it is a blockchain-based tool to represent a transferable security instrument in a given jurisdiction. This paper describes the code functionality in terms of features. And it explains the necessity of this implementation as defined by Fintelum business needs within the Singapore laws. The paper assumes the readers have a basic understanding of how cryptocurrencies work and what blockchains are. It also assumes the reader is familiar with the basic functioning of capital markets and specifically the methods of fundraising and organized trading.

Concept

The entire concept of RPGC, from ownership of virtual assets to its decentralized operation, is that players' assets are globally distributed and not limited solely to gaming purposes.

Beta

RPGC-beta token implemented on BEP20. For improvement tokenomic and listing on the exchanges.

Alfa

RPGC-alfa token implemented on ERC-20. It was issued for SEED round and early investors.

ABOUT REDPAD GAMES STUDIO

The Company is a video game development company based in Zurich, Switzerland.
Our team, with 18 years of experience in the gaming industry, has been involved in such projects as:

The logo for EVE ONLINE, featuring the word 'EVE' in a large, stylized font with 'ONLINE' underneath.

Game engine development
and optimization

Server part, creation of 3-D
environment models and
characters

The logo for Call of Duty Modern Warfare 3, featuring the words 'CALL OF DUTY' and 'MW3' in a bold, blocky font.

Creation of 3-D models
of weapons

The logo for Metro Exodus, featuring the words 'METRO' and 'EXODUS' in a bold, blocky font.

Creation of 3-D models
of environments

The logo for S.T.A.L.K.E.R., featuring the word 'S.T.A.L.K.E.R.' in a stylized, blocky font.

Creation of 3-D models
of environments, weapons
and characters

Military equipment digitization,
cybersports events, creation of 3-D
models of combat equipment

Additionally, we work with NVIDIA on the streaming service GeForce Now and visualization.

RedPad Games consists of 55 people.
Some employees work remotely from Spain, Australia, the USA, and CIS.

STRATEGY

The Company is creating the bridge between gamers and crypto communities through the RedPad Games Coin - RPGC.

The main idea is to allow our clients the opportunity to earn while playing our games and act as investors. We aim to create a bridge between beginners and advanced e-sportsmen.

RPGC-alfa token implemented on ERC-20. It was issued for SEED round and early investors
RPGC-beta token implemented on BEP20. For improvement tokenomics and to listing on the exchanges.

We create Market emission. It is limiting the volume of tokens to prevent hyperinflation and depreciation at an early stage of Dustland's development. In the future, when the company will develop and increase the number of products and customers, we will use DAO treasure. It's accepts the unlock tokens of the economy by investors, gamers and developers thru the voting system.

PRODUCTS

The Game is a 100% ready-to-launch product.
It is a AAA product with a high graphic resolution, created by 55 developers worldwide within 3 years.

The first AAA game in the world that combines MMO, RTS, RPG and Action. During the game, the player can switch from RTS-style gameplay to FPS-like gaming at any time, taking control of their avatars directly. Completion: 80%. The game is scheduled for release in 2023.

WHAT IS THE DUSTLAND GAME?

Concept

The main character is one of the survivors of a series of global catastrophes, a person who is trying to find his place in this terrible new world.

The hero is forced to fight for his survival by searching for the necessary resources to improve his clothing, weapons and shelter/base for one goal - Survival

In this new world, resources are rare and everyone is fighting for survival. The complete freedom the survivors have now in the absence of laws and regulations has become a big problem. The easiest way to get what you need is to kill whoever has it. That has consequences. But one way or another, the hero has to find his own path. Scour the wasteland alone in search of something valuable, create a gang and engage in robbery and murder, or simply trade. It is important to remember that there is only one law in the wasteland - each man save himself.

Third-person AAA-class MMO Action with Survival elements in a post-apocalyptic setting.

Game Theme
Freedom

Game problem
Full freedom is anarchy

Pitch
"Multiplayer, Surviving,
Post-apocalypse"

Free Access

The users of the Gaming platform RED PAD GAMES STUDIO. The game is community-based. Personal accounts are located on the platform. The users get the opportunity to use their Personal Account on the RED PAD GAMES STUDIO platform for free. Access to the payment system opens accounts for players or free members to use the RPGc token.

Easy to Join

It's easy to join the RED PAD GAMES STUDIO community. All that is required is to download and install the latest version of the Personal Account.

Payment system provides

When making a purchase using cryptocurrency as a payment, the transaction goes through the payment system at a fixed exchange rate and is automatically converted into the traditionally recognized fiat currency, to avoid volatility in the cryptocurrency markets. The option of the cryptocurrency payment system does not automatically convert cryptocurrency to fiat currency but allows you (clients) to store digital coins for as long as you wish inside their wallets.

- Requesting a plastic and virtual card (the advantage is the security of cashless payments on the World Wide Web). The fact is that a virtual card can be made once-off for a specific payment. Therefore, even if hackers get its data, they will not be able to use it.
- Possibility The opportunity of obtaining a loan
- Transfers between users of the payment system
- Creation of an account for inter-user settlements
- Receiving and withdrawing cashback credits

GAME MARKETPLACE & MONETIZATION

Character customization

- Tattoos
- Change of appearance
- Unique hairstyles

Armor & cars

- Modules skins
- Full-pack skins
- Accessories

Downloadable content

Seasonal battle pass

In-game items

Player-to-player trade with RPG commission

The design

of the RPGC token emphasizes the right of each node to act at its sole discretion in the affairs of the community. This allows the RPGC Marketplace to independently adjust and debug the token price as close to its market/internal price as possible. Just as the market economy surpasses the planned economy, it would be better to leave the formation of the market to the participating nodes, rather than allowing RPGC to moderate it alone. This is the world's first gaming platform system combined with a cryptocurrency market system, and it uses a gaming token as a cryptocurrency, tied to a payment system and an exchange.

MONETIZATION OF RPGC

Product sale

- Standard - game
- Premium - game + battle pass 1 month
- Deluxe - game + battle pass 1 month + unique skins
- Battle pass - monthly and yearly

Sell Skins

- Weapon
- Vehicle
- Clothing
- Character
- Accessories
- Environment tools

In-game features

- Audio
- Interactions
- In-game service
- Downloadable content
- Advertising in users feed of popular brands
- Sponsor events

Monetization for users

- Opportunity to sell in-game items on the marketplace skins, special weapons found in dungeons, vehicles
- Easter egg rewards twice per year
- Airdrops daily
- Support of other users
- Participate in monthly game events
- Sell accounts on the marketplace

Price range: 25-70\$

The gaming platform combines the system of the cryptocurrency market and uses the RPGC gaming token tied to the payment system and the exchange. The marketplace allows you to: upload your game content, buy a seasonal combat pass and in-game items. Trading between players is carried out with an RPGC commission.

MARKET NEEDS

Business opportunities

Redpad Games studio focuses on MMO, MMORPG and Cybersport games. We are planning to have a share of around 7.7% of the MMO games market by 2027, with an estimated value of 6\$ bin. We aim double it to 2032. We ait to reach these targets by launching new game products and creating crypto tokens to accompany these launches7

TOKENOMICS

Game sales liquidity

30\$ of all game sales will be used for RPGC repurchase. Any RPGC bought this way, will be burned.

TOKEN ALLOCATION OF MARKET EMISSION

STRATEGIC PLAN OF RPGC

Game sales liquidity: 30% of all game sales will be used for RPGC repurchase. Any RPGC bought this way, will be burned.

DEFENITION OF TERMS / GLOSSARY

AML

Anti-Money Laundering is a legal framework that imposes obligations on financial and other institutions to prevent the legalisation of criminal proceeds.

Bitcoin

Open-source blockchain and currency governed by a decentralised consensus system with a cryptographically secured network.

Coin

Unit of an asset on a blockchain, typically referred to as a means of value transfer for the underlying blockchain.

Ethereum

An open-source, blockchain-based platform that enables execution of smart contracts and transferability of Ethereum blockchain-based digital assets.

Utility token

Digital asset intended for use on a platform or network in exchange for a specific product or service from the issuer or other users.

ICO

Initial Coin Offering is a campaign of primary issuance and distribution of utility tokens.

KYC

(Know Your Customer) - a legal framework that requires financial and other institutions to collect personally identifiable information about its customers.

OTC

Over-The-Counter refers to trades taking place outside of centralised exchanges.

P2P

Peer-to-peer refers to decentralised software-based trade execution and trade settlement on the Ethereum blockchain, with a centrally governed KYC/AML compliance process.

Token

Unit of an asset on a blockchain with defined smart-contract functionality.

PEP

Politically Exposed Person, refers to someone who holds a prominent public position, as well as their family members and close associates.

Securities laws

A certain and jurisdiction-variable set of regulations focusing upon issuance and transfer of financial instruments.

Security token

A digital asset, which represents an investment contract (financial instrument) and is regulated by the respective jurisdiction's securities laws.

Smart contract

Programmable transaction protocol that executes a set of defined terms as functions.

Solidity

A programming language that is designed to create Ethereum blockchain-based smart contracts.

US

United States of America.

Dustland security is a security token registered exemption according to the Reg D in SEC, USA. RPGC is a payment token on the Red Pad Games Ecosystem.
